

Drive your Success with *Intelligent Change*

Meet Chama, the intelligent change management software that elevates transformational change from the project to the organization or enterprise level and revolutionizes how companies drive and realize strategic change.

Chama = Change +
Management

Chama™ is cloud-based software that enables companies to drive change agility and resiliency to achieve exponential change.

Chama is a highly flexible and adaptive tool that is compatible with any change management framework you may be using.

✔ Promote visibility & accountability

Illuminate the change magnitude, saturation and risks for your project, program and/or portfolio owners and leaders.

✔ Improve adoption

Empower teams to achieve exponential change and continuous learning through powerful insights.

✔ Make data-driven decisions

Enhance success through holistic views and data-based insights across all initiatives to understand what is changing, who is impacted and by how much.

✔ Optimize time and resources

Build change orchestration into your company's DNA by leveraging Chama's AI-enabled, automated recommendation engine.

✔ Enhance change management skills across the enterprise

Reduce the reliance on siloed knowledge by providing easy access to best practices and key learnings.

With Chama, every step of your change management initiative is data-driven, people-focused, and strategically synchronized with your other enterprise projects.

With Chama, break the silos and reap the rewards of managing a holistic change landscape!

Contact us to schedule a free consultation or demonstration. Visit www.chamacloud.com to find out more.

✔ Insight

Gain robust insights into change magnitude, saturation and readiness from different perspectives for continuous learning and visibility across the enterprise.

✔ Define

Capture up-to-date information about stakeholder readiness, change impacts, and action plans to power Chama's insight capabilities.

✔ Admin

Leverage our assessment templates or create your own, and customize our standard change attributes to meet your organization's specific needs.

✔ Pulse

Push targeted questions for feedback on readiness and effectiveness, which builds knowledge and feeds the AI engine.

Elevate your change mastery with Chama's cutting-edge technology

Chama's AI-enabled learning capability allows each change experience to be evaluated and factored into subsequent decision-making so that initiatives are grounded in data-driven insights and demonstrated best practices. This "recommendations engine" learns from past experience and extrapolates relevant choices that can have the best outcomes for change adoption. This facilitates effective knowledge sharing with consistent change processes across change managers, leaders and stakeholders for better decision-making.
